PERSONAL PROJECTS <https://ohohohobrien.github.io/portfolio/>

SOFTWARE PROJECTS [accessible on my personal projects site](#)

WEB APPLICATION – MAP SHARING SOCIAL MEDIA SITE

- Designed and hosted a web application to allow users to draw paths on a world map and share this along with descriptions and photos
- Developed a server, backend and frontend that seamlessly communicate with OpenLayers API
- Website is mobile responsive with a beautiful user-friendly UX
[Utilised: JavaScript, Django, Python, SASS/CSS, HTML, GIT, SQLite, OpenLayers](#)

ANDROID APP – ROLL DICE WITH ACCELEROMETER

- Designed an Android application that accesses the accelerometer of a smartphone to apply force to virtual dice and roll them
- Has multiple types of dice from 4-sided to 20-sided that all automatically calculate their totals and breakdowns once rolled
[Utilised: C#, Android Development, Unity, Blender, Photoshop, Ad Integration](#)

ANDROID APP – SWIPING MATCHING GAME

- Designed touch screen Android application where users match coloured orbs for points via swiping
- Built from scratch to release and deployed to the Google Play Store with a well maintained code base
[Utilised: C#, Android Development, Unity, Ad Integration](#)

WORK EXPERIENCE
